			ART UNIT	PAPER NUMBER
			2176	

DATE MAILED: 10/18/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 09/472,062	Applicant(s) OHASHI, TADASHI	
	Examiner Maikhanh Nguyen	Art Unit 2176	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 August 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-11 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-11 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 31 December 1999 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. This action is responsive to communications: RCE filed 08/03/2005 to the original application filed 12/23/1999.
2. Claims 1-11 are currently pending in this application. Claims 1, 6 and 9 are independent claims.

Request Continuation for Examination

3. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 08/03/2005 has been entered.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2 and 5-11 remain rejected under 35 U.S.C. 103(a) as being unpatentable over

Serbinis et al. (U.S. 6,584,466 – filed 04/1999) in view of **Usdin et al.** “XML: Not a Silver Bullet, But a Great Pipe Wrench”, 09/1998.

Independent claims 1, 6 and 9

- a. Serbinis discloses an integrated document management system (*e.g., document management system; col.3, lines 14-19*) comprising:
- (i) a storage unit (*e.g., store 30; col.5, lines 47-49*) which stores therein a document database (*e.g., database 25; col.5, lines 27-62*) comprising plurality of documents that are files (*e.g., electronic documents or files; col.5, lines 35-37*) together forming a hierarchical structure (*e.g., hierarchical storage scheme for storing electronic documents; col.7, lines 16-22*) comprising an hierarchy upper layer and hierarchy lower layer ranked below the upper the upper hierarchy layer where document files in the lower hierarchy are referenced above in the upper hierarchy layer (*see Fig.3 and the associated text*), where the structure is defined with hypertext described in an extended markup language (*e.g., XML; col.16, lines 1-25*);
 - (ii) a management information database comprising management information (*col.9, lines 19-32*), the document in the upper hierarchy layer is separate and distinct from the document in the lower hierarchy layer (*e.g., DMS*

system 17 ... supports multiple versions of documents ... maintain the relationships between the documents; col.7, lines 42-57);

- (iii) a server connected to said storage unit (*e.g., store 30 is connected to server computer; col.5, lines 36-47 & Figs. 1A-B*) and provided a manager of the documents (*e.g., control data concerning documents; col.5, lines 27-28*);
and
- (iv) a client connected via a network to said server (*e.g., one or more separate computers connected to server computer; col.5, lines 63-67*) and retrieves together, based on the management information, by accessing said server (*e.g., the electronic document then maybe retrieved by one or more Authorized Users ...The specific access rights granted to each Authorized Users are recorded in the document tables of DMS database 25; col.8, lines 67-col.9, line 32*), the document in the upper layer and the document in the lower layer each having a specified version number from the document database (*e.g., Document instance records are created when new documents or new versions of existing documents are stored to the DMS system; col.7, lines 51-54*).

- b. Serbinis does not explicitly teach “an XML file defining the hierarchical structure by indicating a relation between a document in the upper hierarchy layer and document in the lower hierarchy layer, a document type definition file describing information on a version number of each document, and a document style sheet file defining a style of each document.”

- c. Usdin discloses an XML file defining the hierarchical structure by indicating a relation between a document in the upper layer and a document in the lower layer (*e.g., XML assumes that data are hierarchically structured ... which consist of name 'root' element which begins at the beginning of the document ... The hierarchical structure is fairly obvious in text documents ... a section starts ... the same level ... A section ... subsections; page 126*), a document type definition file describing information on a version number of each document (*e.g., Document Type Definition ... specify what the root element is for a document type ... define the contents of elements ... define relationships among the contents of various elements; page 127; right column – page 128, left column*), and a document style sheet file define a style of each document (*e.g., The language for stylesheets for XML documents; page 128, right column*).
- d. It would have been obvious to one of ordinary skill in the art at the time of the invention was made to include the feature from Usdin in the system of Serbinis because Usdin's teaching would have provided the capability for describing the structure and syntax of XML documents, and identifying all of the types of information that are needed for searching, retrieving, formatting, and tracking.

Claims 2, 7 and 10

Serbinis discloses the management information includes information indicating a collection of a plurality of documents in a on the same layer (*e.g., Document objects 72A and 72B represent a generalized high level description of a document; col.7, lines 28-32*) and version number of the plurality of documents, and said client retrieves, based on the

management information, by accessing from said server the collection of the plurality of documents in the same layer, the documents retrieved each having a specified version number, from the document database (*e.g., hierarchical storage scheme for storing electronic documents ... a generalized high level description of a document ...DMS system 17 also preferable supports multiple versions of documents ...the parent and child document instance, a version name and a unique version ID; col.7, lines 17-62 & Fig.3*).

Claims 5, 8 and 11

Serbinis discloses the management information includes information concerning a security level corresponding to each of the plurality of documents and said server permits or inhibits retrieval of the document according the security level (*col.7, lines 8-62 & Abstract & Fig.2*).

5. Claims 3-4 remain rejected under 35 U.S.C. 103(a) as being unpatentable over **Serbinis et al.** in view of **Usdin et al.** as applied to claim 1 above, and further in view of **Hashimoto et al.** (U.S. 5,893,114 – filed 11/1996).

Claim 3

- a. The combination of Serbinis and Usdin does not explicitly disclose “*the server registers, when a document registered in the document database is updated, the updated document in the document database, and also updates the version number information in the management information concerning the document.*”
- b. Hashimoto discloses the server registers, when a document registered in the document database is updated, the updated document in the document database, and

also updates the version number information in the management information concerning the document (*e.g., the document once registered ... the document is periodically updated; col.5, lines 15-52 & fig.12*).

- c. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to combine Hashimoto's teaching in the system of Serbinis as modified by Usdin because Hashimoto's teaching would have provided the enhanced capability for automatically storing a referred electronic document in a database and notifying new information to a user.

Claim 4

- a. Serbin is discloses said client sends via the network to said server retrieval information for a document that has been retrieved (*fig. 1B*). However, the combination of Serbinis and Usdin does not explicitly disclose "*said server sends, when a document corresponding to the retrieval information is updated, updating information related to the document updated.*"
- b. Hashimoto discloses said server sends, when a document corresponding to the retrieval information is updated, updating information concerning the updated document via the network to said client (*e.g., server is always accessed to acquire the latest document data; col.5, lines 36-45*).
- c. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to combine Hashimoto's teaching in the system of Serbinis as modified by Usdin because Hashimoto's teaching would have provided the

enhanced capability for automatically storing a referred electronic document in a database and notifying new information to a user.

Response to Arguments

6. Applicant's arguments filed 08/03/2005 have been fully considered but they are not persuasive.
 - a. Applicant argues in substance that *the prior art does not teach or suggest a higher level referencing documents in a lower level*. (Remarks, page 7)
 - b. In response, Serbinis teaches (*see fig.3*) the relationships in the hierarchy in which document files in the lower level (*74A and 74B*) are referenced by the upper level (*73A, 73B, and 73C*).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hemphill et al.	U.S. Patent No. 6,167,448	issued: Dec.26, 2000
-----------------	---------------------------	----------------------

Lerence et al.	U.S. Patent No. 6,662,182	issued: Dec.9, 2003
----------------	---------------------------	---------------------

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Maikhanh Nguyen whose telephone number is (571) 272-4093. The examiner can normally be reached on Monday - Friday from 9:00am – 5:30 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Heather Herndon can be reached on (571) 272-4136.

Art Unit: 2176

The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
